

ULTRASOUND EQUIPMENT EVALUATION CRITERIA

Below is a comprehensive list of bullet points to help a PRC/PMC in its decision-making process when looking for a new ultrasound system. “Equipment Facilitation” is a *complimentary* service that we provide to the PRC/PMC Community based on our experience and expertise in the ultrasound world.

In addition to our above-mentioned experience, we have gone out and performed our due diligence by meeting with the various ultrasound manufacturers and gathered the pertinent facts and information most relative to the PRC/PMC needs and applications for ultrasound. We have gathered all of the facts and narrowed down the manufacturers and specific equipment that we felt best met those specific needs of the PRC/PMC client.

Those facts would include, but not be limited to the following;

- Manufacturers strong in Women’s Health
- Manufacturers who are committed to and support the PRC/PMC Ministry
- Manufacturers who do not sell within or support abortion clinics
- Manufacturers with a National Sales Force
- Manufacturers with a National Service platform complete with parts inventory
- Manufacturers with a “low cost” Extended Warranty Service Program
- Manufacturers who will conduct a System Demo at no charge, if requested
- Systems that are “user friendly”
- Systems that have excellent penetration and image quality
- Systems that have incorporated latest technology
- Systems that have an excellent and reliable track record
- Systems that are priced competitively
- Systems that come with a “multi-year” Standard Parts and Labor Warranty
- Systems that include shipping
- Systems with the greatest overall value proposition
