## **First impressions of Connie** (Sonography Now, ELN, Sparrow)

I first met Connie in 2008 when attending a nurse manager's didactic course for limited obstetrical ultrasound. Connie was intrigued by the fact that I was a new graduate nurse entering into this unique clinical setting. She expressed even greater excitement to learn that I held a degree in Health Services Admin and shared that she'd literally just been sitting across the room talking to the Lord about the need for that expertise on her team! I was excited over her excitement and how the Lord had so quickly and graciously answered prayer! We exchanged contact information and corresponded a couple weeks later.

I recall being so enthused about the vision that Connie held for raising the bar of excellence in the pregnancy center setting. I knew immediately that I wanted to be a part of what the Lord was doing!

I also had the privilege of being trained in ultrasound through Sonography Now and was blown away by the passion and skill held by Connie, Charlene and other talented trainers.

Eight years later, through many changes, I am still thankful to be a part of this team.
