## First impressions of Connie (Sonography Now, Sparrow)

I became the Executive Director of a pregnancy center that had recently turned medical. When I arrived to the center I had to be completely self-taught as there was no one there to train me, and a staff of 1 and a volunteer Nurse Manager.

A couple months into the new position my Nurse Manager became ill suddenly and had to leave the center. We had ultrasounds booked and no one there to help. I reached out to Connie and her staff at Sonography Now, as they had previously trained our Nurse Manager before my arrival.

Connie and her staff worked with my center to enable us to continue scanning our clients and eventually trained a new permanent Nurse Manager for our center.

Every time I met with Connie she was a ray of sunshine, and her staff was always willing to go above and beyond to help us in any way. The team at the Sonography Now were truly life savers to our organization. I cannot imagine going through the issues we did without their team by our side!
