

Michelle Tussing, RN, RDMS

Michelle has been able to lead, train and encourage nurses in her role as Nurse Manager for CPC of Greater Phoenix for 10 years. An RN for 30 years and an RDMS for 6 years, Michelle has had the great opportunity to speak in Community College classrooms often on STDs, fetal development, contraception and abortion. Twice, she has spoken at the CPC banquet, and received encouraging feedback. Michelle has also had the joy of traveling to the Philippines several times to assist nurses and midwives in their ultrasound skills.

Her passion is to provide safe and compassionate medical care to women and families who are facing an unintended pregnancy. Through this medical care, women and families are empowered to make informed choices based on knowledge rather than fear. Michelle loves how ultrasound displays the glory of God.

She is married to Dave and they are active in their small church. In their spare time they like to cycle together and in groups. Her son and his wife live close by with their two boys Jaxon and Carson. Her daughter is a student at Northern Arizona University. Michelle just graduated from Grand Canyon University after completing the RN to BSN program.
